PROFESSIONAL EXPERIENCE

Senior Technical Writer

Hexure (08/23 – Present)

- Work with leadership to define and standardize internal processes
- Collaborate with Subject Matter Experts (SMEs) to write internal training documentation for Hexure's departments, such as Client Delivery, Technology & Enterprise, Sales, Product Management, HR, and Legal
- Use MadCap Flare to generate client-facing product documentation for Hexure's Online Help systems, as well as API documentation
- Create REST and SOAP API reference guides for developers, clearly explaining architectures, payload formats (JSON and XML), and client-specific integration considerations
- Write and publish release notes for Hexure's products
- Organize and help maintain Hexure's Learning Management System (LMS)
- Write role-specific guides for technologies used within the organization; for example, Azure DevOps, Visual Studio Code, Jira, Microsoft PowerBI, GitHub, and in-house platforms
- Conduct usability testing for all documentation produced
- Train and mentor newly hired Technical Writers

Technical Writer (Contract)

Solomon Page/Cigna (07/22 – 08/23)

- Authored documentation for Cigna stakeholders who are undergoing data software migrations
- Edited internal-facing technical documentation for Cigna's Data, Analytics, and Engineering department
- Organized and updated content in Confluence
- Collaborated with software engineers to write subject matter
- Researched processes within Cigna's patient data system

Technical Writer (Contract)

Conexess Group/Jack Henry (12/21 – 07/22)

- Published banking software documentation for Jack Henry & Associates
- Documented and reviewed development criteria in Azure DevOps
- Discussed product content with software developers
- Created and processed client-facing documentation, using DITA XML, Tridion Docs, and Adobe Acrobat

WD Data Documentation and Security Specialist (Contract)

NSTAR Global Services/Micron Technology (06/21 – 12/21)

- Reviewed and updated training content for Micron Technology
- Organized documentation within the organization's Learning Management System and SharePoint Online libraries
- Applied company branding and security standards to published training documents
- Worked with Confluence to publish and manage company content, as well as facilitate user access to material
